

Overview:      Print a given string.

Description:    Tadashi has just begun designing and developing his state-of-the-art nursebot. He's trying to come up with a good greeting for the robot, but can't seem to get it right. Fortunately, we might be able to lend a hand! Please print the string `"Hello. I am Baymax, your personal healthcare companion."` (without the quotes) for Tadashi as quickly as possible. He needs your help!

Filename:      `string.{java, cpp, c, cc, py}`

Input:          None

Output:        `Hello. I am Baymax, your personal healthcare companion.`
